**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 April 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

Art Unit: 1656

Claims 1-4 are pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- |           |  |
|-----------|--|
| Group I   | Claims 1 and 2, drawn to a nucleic acid encoding thermostable serine proteinase, classified in Class 536, subclass 23.2.     |
| Group II  | Claim 3, drawn to a method identifying thermostable enzymes, classified in Class 435, subclass 4.                            |
| Group III | Claim 4, drawn to a method of cleaving peptide bonds by the thermostable proteinase, classified in Class 435, subclass 68.1. |

The inventions are distinct, each from the other because of the following reasons:

The protein sequences of Group I and the DNA sequence of Group II and are independent chemical entities and require different literature searches.

The nucleic acid of Group I and the methods of Groups II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together as the methods of Groups II and III do not utilize the nucleic acid of Group I.

Inventions of Groups III-V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are independent methods having different steps and products.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
